**NO CHARGE UPGRADE PROGRAM** to reduce the risk for a fuel tank puncture

## **NOVEMBER 30, 2003 COMPLETION DATE NEARS FOR FORD MOTOR COMPANY'S UPGRADE PROGRAM FOR CVPI VEHICLES**

In October 2002, in order to further reduce the risk for a fuel tank puncture in a very high-speed rear-end impact, Ford Motor Company began offering no-charge Upgrade Program 02B02 for certain 1992 through 2003 model year CVPI vehicles currently in law enforcement duty.

This no-charge program is scheduled for completion by November 30, 2003.

Your servicing Ford, Lincoln or Mercury dealer will install the following Upgrade Kit components as part of Upgrade Program 02B02:

- Axle-mounted shields
- Fuel tank strap shields
- A differential cover shield
- Revised mounting of the evaporative emissions canister ('98 – '03 model year only)

Response to the availability of no-charge Upgrade Program 02B02 has been excellent. However, Ford is aware that some law enforcement fleets have yet to complete the program.

With no parts shortage or shipping delays, Ford urges all remaining owners of eligible CVPI vehicles to have the Upgrade Kit installed. Call your servicing Ford, Lincoln or Mercury dealer to make an appointment for an Upgrade Kit installation.
